SUBJECT INDEX

α_2-adrenoceptor stimulation,
  affects heat production in steers, 291
Acantopagnus schlegeli, 35
Acclimation,
  effect of heart rate in *Xenopus*, 55
  in marine crabs, effect on membrane lipid composition and fluidity, 207
  to temperature and dynamic range of signalling in horizontal cells of carp retina, 223
Acclimatization seasonal,
  and thermoregulatory responses in *Apodemus*, 437
  effect on freeze tolerance, survival and plasma glucose and osmolarity in wood frogs, 349
Acidosis,
  potentiation of hyperthermic cytotoxicity, 321
Adaptation,
  to temperature in the contractile apparatus of fish, 167
Ambient temperature,
  and RH, effect on physiological responses of chickens and turkeys, 245
Amphibia, 49, 55, 349
Anemonia viridis, 15
Annelids, 79, 91, 105
Annual breeding cycles,
  timing of in marine invertebrate species and environmental temperature, 79
Anodonta cygnea, 43
Anolis equestris, 315
Anous stolidus, 307
Apodemus sylvaticus, 437
Appetite,
  effect of simulated climate change on in rainbow trout, 231

BAT,
  effect of overfeeding on, in rats, 477
Behavioural thermoregulation,
  in lacertid lizards, 497
  in three species of South American cicadas, 451
Birds, 245, 263, 271, 381
Blood flow,
  increased in the hindlimbs of cold exposed rats, 343
  in response to intramuscular endotoxin injection in guinea pigs, 431
  in skin and hemihidrosis in humans, 425
Blood metabolites,
  changes in during the hibernation cycle in two reptiles, 367
Body temperature,
  and bacterial endotoxins in lizards, 315
  and endotoxin administration in guinea pigs, 431
  daily rhythms of in *Apodemus* under different photoperiod regimes, 437
  effect of Freund's complete adjuvant on in rats, 405
  in behaviourally thermoregulating lizards, and infra-red irradiance, 497
  in brown noddies, 307
  in chickens and turkeys, 245
  in grey shrikes, 263, 271
  in humans, effect of nicotinic acid ingestion on, 409
  in humans during exercise, 489
  in steers, 291
  in three species of South American cicadas, 451
Bos taurus, 291

Caenorhabditis elegans, 355
Calanoides acutus, 75
Calanus propinquus, 75
Calorific intake,
  effect on BAT metabolism, mass and lipid composition, 477
Cancer pagurus, 207
Carcinus maenas, 207
Catecholamines,
  changes in blood levels during hibernation cycle in two reptiles, 373
Cavia porcellus, 431
CHO cells, 333
Climate change,
  effect on latitudinal distribution of zooplankton and intertidal organisms, 127
  modelling of, and predictions for regional ecosystems, 175
  prediction of effect on marine invertebrate breeding and life cycles, 79, 91
  simulated, and response to in *Hyalella* and *Nemoura*, abundance and growth studies, 199
  simulated on the growth and protein synthesis of rainbow trout, 231
Clothing selection,
  by women when cooled, 327
Clupea pallasi, 35
Cold exposure,
  in rats, hindlimb muscle heat production does not meet limb heat loss, 343
Coelenterate, 15
Critical thermal maximum,
  of fourteen species of marine fish, 35
Crustacea, 75, 79, 105, 127, 199, 207
Cyprinus carpio, 223

Development, rate of,
effect of change in temperature and humidity on in *Drosophila*, 389, 399
effect of regular and irregular cycling temperature and humidity on in *Drosophila*, 399
Dorisiana bonaerensis, 451
Dromaius novaehollandiae, 381
Drosophila melanogaster, 389, 399

Elephantulus brachyrhynchus, 445
Elephantulus intufi, 445
Endothermy,
evidence for in three species of South American cicadas, 451
Engraulis japonica, 35
Evaporative heat loss,
and ambient temperature in African elephant shrews, 445
and ambient temperature in grey shrikes, 263
at high ambient temperature in brown noddy, 307
from upper airways in man influence brain temperature, 489
Exercise,
respiratory heat loss and core temperatures in man, 489

Fever,
an experimental model in rats, 405
caused by *Aeromonas* in *Opulurus* but not in *Anolis*, 315
endotoxin induced in guinea pigs, effect on vasomotor reactions, 431
Fidicina mannifera, 451
Fish, 1, 35, 127, 157, 167, 191, 223, 231
Freeze tolerance,
seasonal variation in wood frogs, 349

Gallus domesticus, 245
Gene expression,
qualitative and quantitative changes in fish from different thermal habitats, 167
Goniopora djiboutiensis, 15
Goniopora pandoraensis, 15
Goniopora stokesi, 15
Growth,
effect of simulated climate change on in rainbow trout, 231

Heart rate,
and temperature in *Xenopus*, effects of drugs on, 55
Heat death,
in *Perna*, 461
Heat injury,
in brown mussel in relation to fouling control, 461
molecular basis of in cells, 191
potentiation of in mouse kidney cells by low pH, 321
Heat load,
determination of from solar radiation in emu, 381
Heat loss,
from hindlimbs of cold exposed rats, 343
from upper airways in man influences brain temperatures, 489
increased sensible, caused by ingestion of nicotinic acid, 409
Heat production,
by hindlimb muscles in cold exposed rats, 343
in *Apodemus* and seasonal cues, 437
in steers reduced by adrenoceptor stimulation, 291
Heat resistance,
of ciliary activity of *Anodonta* gills, effect of acclimation and heat shock, 43
Heat shock proteins,
abundance of a novel 33 kDa protein from zooxanthellae of several coelenterates depends on heat shock and season, 15
differential expression of hsp 70 proteins by heat and cadmium in *Caenorhabditis*, 355
in gills of *Anodonta* after heat shock, 43
purification and characterization of 26 kDa protein from heat stressed CHO cells, 333
reduction and restoration of 26 kDa protein in the nuclei of CHO cells, 333
Heat transfer,
determinations of in mammals of different size, 281
Heterozygosity,
and maintenance metabolism and protein turnover in ectotherms, 23
and the response to simulated climate change on two lotic species, 199
Hibernation,
carbohydrate metabolism during in two reptiles, 367
Hot environment,
effect of constant and cycling on proliferation of lymphocytes in sows and litters, 485
Human, 327, 409, 425, 489
Hyalella azteca, 199
Hyperthermia,
induced by Freund's adjuvant in rats, 405
in grey shrikes in heat stress and water conservation, 263
local, effect on brain microcirculation, 469

Ice content,
seasonal dependency of in wood frogs at −5°C, 349

Infra-red irradiance,
and changes in set point temperatures in lizards, 497
Infra-red thermography,
use in determination of surface temperature of terrestrial mammals, 281
Insect, 199, 389, 399, 451
Insulation,
of pelage prevents heat flow from surface heated by solar radiation, 381

Lacerta vivipara, 497
Lanius excubitor, 263, 271
Lateolabrax japonicus, 35

Malpolon monspessulanus, 367, 373
Mammal, 255, 281, 291, 343, 405, 437, 445, 469, 477, 485
Meleagris gallopavo, 245
Membranes,
as targets for cellular heat injury, 191
changes in lipid composition and fluidity of, and acclimation to temperature in crabs, 207
Metabolic rate,
and ambient temperature in brown noddy, 307
and seasonal acclimatization in pigmy shrews, 255
measurements in grey shrike, 263
of African elephant shrews, 445
Metabolism,
and superiority of multilocus heterozygote ectotherms in heterogeneous environments, 23
Microcirculatory responses,
to local hyperthermia in mouse brain, 469
Mitochondria,
effect of temperature and salinity of structure of from chloride cells of turbot larvae, 1
Model,
of climate change for assessment of impact on regional ecosystems, 175
Mollusc, 23, 43, 79, 127, 461
Mus muscularis, 469
Myofibrillar ATPase,
thermostability of from fish adapted to different thermal habitats, 167
Mytilus edulis, 23

Nematode, 355
Nemoura trispinosa, 199

Oncorhyncus keta, 35
Oncorhynchus mykiss, 231
Oplegnathus fasciatus, 35
Oplurus cyclurus, 315
Oreochromis niloticus, 299

Pagrus major, 35
Parapristipoma trilineatum, 35
Perna indica, 461
Petrodromas tetradactylus, 445
Photoperiod,
a factor in regulatory performance in *Apodemus*, 437
Podarcis muralis, 497
Preferred temperature,
of fourteen species of marine fish, 35
Protein turnover and synthesis,
in rainbow trout, effect of simulated climate change, 231
Pseudocaranx dentex, 35

Q_{10}, 23, 55
Quesada gigas, 451

Rana sylvatica, 349
Rat, 343, 405, 477
Reproduction,
in marine invertebrates, effect of environmental temperature in, 79, 91
oocyte development in arctic charr and temperature, 157
Reptile, 315, 367, 373, 497
Retina,
effect of temperature acclimation on, response of horizontal cells, 223

Salvelinus alpinus, 157
Sardinops melanostictus, 35
Sea temperature,
and distribution and abundance of zooplankton and intertidal organisms, 127
factors affecting annual cycle of in shelf seas, 111
Sebastes schlegeli, 35
Set point temperatures,
in lacertid lizards, 497
Seriola quinqueradiata, 35
Scophthalmus maximus, 1
Shivering,
in brown noddy at low ambient temperatures, 307
in cold exposed rats, 343
Sillago japonica, 35

Size,
and surface temperature in terrestrial mammals, 281
effect of rearing temperature on in aquatic ectotherms, a general rule examined, 61
Skin temperature,
and hemihidrosis in humans, 425
increase in in humans following ingestion of nicotinic acid, 409
Solar radiation,
and heat load in emu, 381
Sorex minutus, 255
Standard operative temperature,
field measurements of from taxidermal mounts, 271
Suis suis, 485
Sweating,
unilateral inhibition of in humans in response to external application of pressure, 425

Taxidermal mounts, 271
Temperature,
annual cycle of in seas, 111
effect on lake outlet communities, 121
effect on oocyte development of arctic charr, 157
effect on surfacing behaviour of *Xenopus*, 49
lethal of fourteen species of marine fish, 35
low, effect on blood parameters in salt-acclimated tilapias, 299
rearing, effect on growth and final size in aquatic ectotherms, 61
surface, regulation of in mammals of differing size, 281
tolerance of in two antarctic copepods, 75
Thermal conductance,
of African elephant shrews, 445
of *Apodemus*, 437
of grey shrikes, 263
Thermal pollution,
response of brown mussel to, 461
Thermal polypnea,
in brown noddy at high ambient temperatures, 307
Thermal sensation,
factor in choice of clothing in cooled women, 327
Thermoneutral zone,
of African elephant shrews, 445
of brown noddy, 307
of grey shrikes, 263, 271
Thermoregulation,
behavioural in lacertid lizards, 497
behavioural in three species of S. American cicada, 451
effect of administration of endotoxin on in guinea pigs, 431
in *Apodemus* and photoperiod, 437
in brown noddy, 307
in grey shrikes, 263
in humans affected by ingestion of nicotinic acid, 409
in three species of African elephant shrews, 445
Trachurus japonicus, 35

Uromastix aegyptius, 367, 373

Vasomotor Index,
scales with body mass in mammals of differing size, 281

Xenopus laevis, 49, 55
